

CC + FN + OOM

Development for the Atlas:

- Review the color pallet

- Check the info pop-ups
 - Distribute the instructions on more pop-ups
- Balance better the elements
- Reduce the font size in the city stats
- Left align cities, queries
- Re-think the interactions for the queries
- stacked → Cumulatives → Layered → All
Set type → Categories → Isolated

+ For each query (q) we need to show the values associated to the steps/nodes

- Display q output
- Buttons for All categories vs Single categories
- Change to Least, Mid, Most + q name from Less to More

Centrality → Central; Close; Gnd → Dense

- Re think the name of Closeness
- Change Gnd to Density Grid (of the transit network)
- Add a one sentence description to the hover
 - Node Centrality
 - Node Connectivity
 - Transit Network Density

For the grant applications

- Get in contact with

- Partners - Transport agency
- NGO that work around the topic
- Universities

New Queries **Add to PPtx** Done

- Node Accessibility

- TOD Service, amenities (in the pipe)
